Betweene Newyeers daye and Shroue sunday, are eight weekes
The bad dayes to fall sicke in or to take any principall kinde of Physick, &c. are noted in the Almanacke with this marke *.

Ane-

A neceſſarie and perfect rule to know the beginning and ending of euery Terme, with their Returnes.

Hillarie Terme beginneth the .xviii. day of Januarie (If it be not Sunday) which ſo being, it is then deferred vntyll the day following, and endeth the .xii. of Februarie. Which Terme hath foure Returnes. That is to ſay.

Octabis Hillarij. } { Craſtino Purifica.
Quind. Hillarij. } { Octabis Purifica.

Eaſter Terme beginneth .xvii. dayes after Eaſter, and endeth the Munday next after Aſcention day. And hath fiue Returnes. That is to ſay.

Quind. Paſchæ. }
Tres Paſchæ. } Menſe Paſchæ } Quinq; Paſchæ.
Craſtin. Aſcention.

Trinitie Terme beginneth the Fryday next after Trinitie Sunday, and endeth the Wedneſday fortnyght after. And hath foure Returnes. That is to ſay.

Craſt. Trinitatis. } { Quind. Trinitatis.
Octab. Trinitatis. } { Tres Trinitatis.

Michaelmas Terme beginneth the .ix. day of October (if it be not Sunday, as is before ſayde) and endeth the .xxviii. of Nouember. And hath eight Returnes. That is to ſay.

Octabis Michael. } { Craſt. Animarum.
Quind. Michael. } { Craſt. Martini.
Tres Michael. } { Octa. Martini.
Menſe Michael. } { Quind. Martini.

Note alſo, that the Exchequer openeth eight dayes before any Terme beginne, except Trinitie Terme, in which it openeth but foure dayes before.

The Anatomie of mans body, as the partes thereof are gouerned by the. xii. Celestiall Signes.

Aries. The head and face.

Taurus Necke & throte.

Gemini Armes & shoulders

Cancer Brest, stomacke & lungs.

Leo. Hart & backe.

Virgo. Guttes & belly.

Libra. Reines & loynes.

Scorpio Secrets and bladder.

Sagittarius. Thighs

Capricornus. The knees.

Aquarius. The leggs.

Pisces. The feete.

Ianuarie hath.xxxi. dayes

Good Wine (sayth Ianus) and Spice,
this moneth cannot hurt thee:
But Medicines count naught,
and venery worse for thy body.

Watſon. 1598

A Prognoſtication for this preſent yere 1598.

Conteining a diſcription of the Eclipſes, with the eſtate of the foure quarters, & the change of the ther, for euery day in the yere.

With other matters conuenient in ſuch a woorke to be noted: drawne from the aſpects of the Erraticall ſtars.

By Robert VVatſon Practicioner in Phiſicke.

Non quam diu, ſed quam bene.

Imprinted at London by Richard Watkins and Iames Roberts.

Cum priuilegio Regiæ maieſtatis.

Of the three Eccliplſes to happen this preſent yeere. 1598.

Of the firſt Eccliplſe of the Moone.

VPon the xi. of February being Satterday about 26. minutes after iiii. of the clocke in the mozning, the Moone (mouing in the vii. houſe of the heauens, in the firſt denarie of the earthly ſigne Virgo) will be Ecclipled and depriued of her light, which obſcuration (affecting for a time the whole body of the moone) by reaſon of the greatnes and other circumſtances conſidered is like to wozke no ſmall effects in the wozld, as ſhall afterward be noted.

Of the Eccliplſe of the Sunne.

BY reaſon of the body of the Moone placed betweene our ſight and the light of the ſunne, we ſhall perceiue a manyfeſt Eccliplſe oz hindzance of the Sunnes light vnto vs vpon the xxv. of February being Satterday a quarter of an houre before xi. of the clock in the forenoone: which will be troubleſome to the Sunne, mouing at that inſtant in the eleuenth houſe, and the xvii. degree of the wateriſh ſigne Piſces, hindering the light thereof to the quantitie of 8. parts and a halfe: This defect of the Sunne (accozding to the opinion of the beſt writers) threatneth moſt perilous euents in the wozld (as Meſahalah ſayth) whenſoeuer the Sunne is Ecclipled, it cannot be but ſome great chaunce muſt follow accozding to the greatneſſe of the Eccliplſe, except God wonderfully wozke the contrary at his pleaſure: which dangerous effects both of this Eccliplſe and that of the moone go-

ing before, for that together they take place in the Summers revolution next, I purpose to note them then in that place.

Of the second Eclipse of the Moone.

IN like manner vpon the vi. of August being Sonday, almost halfe an houre after vii. at night, the moone placed in the second face of the colde and moist signe Aquarius in the xii. house, &c. wilbe totally Eclipsed, appearing in that troublesome estate vnto vs, of a blacke colour mixt with a little red, this Eclipse worketh his effects, especially in Autumne season next ensuing, whereof then as occasion shall serue.

A declaration of the foure quarters of this present yeare, noting the disposition and accidents of the same.

First of Winter.

Sol in ♑ ♒ ♓.

AT the progression of the Sun (in his continual course) into the first scruple of the winter solsticiall signe Capricornus began our common winter quarter, which was vpon the xii. of December, last in 1597. that being the shortest day in the yere, &c. which winter season continueth alway till the Sunne hath passed thorow those Hiemall signes, lengthning euery day by degrees, vntill the Vernall Equinoctiall, &c. which is the first day of our vsuall spring.

Touching the estate and disposition of this quarter, my iudgement of it generally is thus. The first moneth namely Januarie is like to play a right winterlike part, especially in

in the beginning, with many verie wet dayes, and cold rawe moiſt weather, and bluſtering ſtormes of raine and ſleete. The ſecond moneth Februarie promiſeth more pleaſing weather, and pleaſant to helpe forward the ſpring, yet windes wilbe verie buſie, and ſometime haile and ſnowe, but for the moſt part a faire month conſidering the ſeaſon: the laſt month being part of March, threatneth rough windie blaſts, and ſharp cold daies, but yet dry for the moſt part, to make March duſt in plentie.

The diſeaſes moſt like to afflict mens bodies this winter quarter will be diuers ſtrange agues, many extraordinarie accidents in the head, diſtempering the ſences, diſtillations into the ſubiect partes of the bodie, as into the Longes, ſtomacke reynes and the ioyntes: many troubled with hoarſenes the cough, and ſtopping in the lungs and pipes: ringing in the head, paine in the eares, teeth and throat: palſies, crampes, and numnes of the members, the collick and Iliack paſſion verie buſie in thoſe that are ſubiect vnto them, manie kindes of ioynt paines and lamenes, with other ſharpe diſeaſes: as the pleuriſie, Angnia, and many kindes of dangerous apoſtumes, which muſt be regarded in the beginning for feare of deadly danger. &c.

Thus will the ſtars if God aſſent.
Whoſe power alone can all preuent.

Of the Spring.

Sol in ♈ ♉ ♊

PHebus (hauing finiſhed his whole yeares courſe thorow euerie degree of the xii. Signes) beginneth his iourney afreſh, entring the firſt minute of Aries, & to the ioy of al liuing creatures, beginneth to cheare the earth with his hot ſhining beames, whereby all thinges on the earth begin to growe againe, and our moſt pleaſant and healthfull quarter (vſually called the ſpring) is ſo begun, which happeneth vpon the xi. day of March this preſent yeare, and continueth til the ſuns entrance into the Sommers ſolſticiall Cancer as followeth, &c.

This quarter (which naturally is the moste temperate season in the yeere) is disposed in the beginning til the end of March to keepe his naturall course, but at the change of the Moone it thzateneth a change of weather: the moneth Apzill will be altogether vnconstant in his kind, with shewring windy dzawes and cold dzining shewers, which wil not be mitigated till the end of the moneth, and yet not then altogether ceased: but keeping some course till the best part of May be spent, is like to make the best part of the spzing very vnkind, but the end of May and part of June, pzomiseth to conclude the spzing with moze Sommerlike weather, and to make amendes to the earth foz her well nigh decayed fruites. &c.

The grefes like to assaulte and afflict mens bodies this spzing are supposed wilbe many putrid and doubtfull feuers, Impostumes in the head and stomache, the Pleurisy and Peripneumonia, the small Pores & Measels, with many kinds of scabes and ytching Tetters, also Biles and swellinges in many parts of the bodie, paines about the Midzife, stomache and reignes: headach and trouble in the eyes, the yellowe Jaundies, and dangerous Flures, with spitting of blood and diuers wasting diseases, and many by relapses and falling agaime into ill cured agues, will hardly escape eyther death oz most dangerous consumptions: also much cozruptiō of blood wilbe in young bodies this yeere, whereof diseases very doubtfull will ensue, if the beginnings be not stopped by the counsell of the skilfull.

Infections from the starres may fall:
But one aboue doth stay them all.

Of Sommer.

Sol in T. S. m.

The Sunne being now mounted in his motion to the highest point of his course, namely to the first degree of the Estiuall Solstice Cancer, maketh the longest day in the whole yeere and so the shoztest night &c. at which time beginneth our common Sommers season, which is this yeere

vpon

vpon the xii. of June being Munday: which quarter endureth till the Sunne hath gone thorow those three Summer signes aboue written, from the first day whereof the dayes continually decrease by litle and litle euen to the contrary Solstice Capricornus described before.

This Sommers season, which is naturally parching hot and dry, is disposed this yeere indifferently to performe the ordinary effectes of Sommer, and though nowe & then a thundering tempest and such like weather, (especially in the end of June and many dayes of July) are like to happen, yet it promiseth of it selfe for the most part a pleasant fruitfull Sommer: except the effects of the two Eclipses which take place in this reuolution, alter the course of nature, which is much to be doubted by the iudgement of the best Writers, which pronounce no small accidents both by reason of the greatnes of the saide Eclipses, and also both their effects meeting together, vnlesse God the commander of all, countermand the operation of naturall causes.

The effects of one of these Eclipses, namely of the Sunne taketh place vpon the vii of July this present yeare, and the other, viz. of the Moone, beginneth vpon the xxi day of the same moneth, and the effectes of the second Eclipse of the Moone taketh place about the beginning of August &c.

The principall accidents of these Eclipses conuenient to be noted in this season, are many cloudy and darke dayes, with much fall of moisture, bringing great ouer-flowings and inundations with water, to the decay of many things on the earth: also many tempests of thunder, lightning, and windes, terrible both to men and beasts: and diuers strange and dangerous diseases, euen to the death of many, besides great destruction of fishes about the Coast: and as Procius noteth by the Suns defect in the xi. house an earthquake neere the sea side is like to be felt, to the terrifying of many: other tragicall predictions signified by the said Eclipses I omit, and refer them to the pleasure of the Almightie, whose benuolent looke can turne al the malenolent aspects of the starrs and planets from euill to good at his pleasure.

The diseases of this Sommers reuolution, besides most of those noted in the former season, are threatned by the foresaid Eclipse to be most strange infectious deadly feuers, and hot inflamed Impostumes in the throate, Lunges, stomacke and Liuer, Pimples, Vlcerous scabs, running in the reignes

with the bloody flixe and Disenterie, the letargie and sleeping disease, with singing noyse in the eares and head by rewme and windines, and many infecting contagious diseases, &c.

Though starres encline to worke vs ill,
All shalbe as the maker will.

Of Autumne or fal of the Leafe.

Sol in ♎ m ♐

NOw is the first day of our Autumne or harueſt quarter when the ſun goeth into the firſt minute of the autumnall Equinoctiall, Libra, and ſo paſſeth thorow theſe three ſignes, till the firſt day of Winter nert following, being the firſt quarter of the enſuing yeare 99. The iuſt time of the ſuns entrance into this Equinoctiall, this preſent yere is vpon the xiiii. of September. &c.

This quarter (called moſt fitly the fall of the leafe, being contrary both in time and qualitie to the greene leafe, ſpreading ſpring,) is diſpoſed this yeare to begin kindly and faire, with many faire dayes, till towardes the end of October, at which time the weather is like to change, and the ſkie to bee troubled with vntinde blaſts and boiſterous ſtormy dayes, but the ende threatneth a colde and ſharpe concluſion, with deepe ſnowes and ſwelling ſtouds, which the laſt Eclipſe will heape one vpon another, notwithſtanding the foreſayde friendly predictions, gathered from the benevolent aſpects of well diſpoſed Planets: which Eclipſe beginneth to worke his effectes vpon the xiii. of September this preſent yeare: the ſpeciall dangers whereof I omit, remembring directly that which pertayneth to the change of weather moſt fitting the time and matter to be noted in this place.

Deſeaſes moſt like to raigne this quarter are to be doubted will be long lingering agewes, ſplenetick deſeaſes, and many kinds of obſtructions in the liuer, Jaundies, eſpecially blacke, the hemeroides and ſwellings, with ſcabbes and dry itches, ioynt paines, and the flixe Lientery, the Collick and ſtone, and much ſuppreſſion of the vrine: with diuers other diſeaſes in the reynes and bladder.

Thus euerie Planet in his kinde,
Is to perfourme the Almightyes minde.

A declaration of the change of weather for euery day in the yere.

Of Ianuarie.

THe first and second cold blustering moist daies: the iii. not so wet, though like to haile or snow.

First quarter the iiii. being Wednesday a drying windy day, the v. and vi. like to be frosty, the vii. and viii. and ix. faire windie daies though sometime ouercast, the x. and xi. misling daies.

Full Moone the xii. being Thursday, and the xiii. faire winter dayes, the xiiii. a little troubled skie, the xv. and xvi. verie vnseasonable daies, the xvii windie stormes but not so bad as the former.

Last quarter the xx. being fryday and the xxi. pleasant dayes, though close mornings, the xxii. and xxiii. indifferent dayes, the xxiiii. and xxv. pleasant frosts, the xxvi. a lyttle changed to moisture.

New moone the xxvii. being fryday a dewy day: the xxviii. & xxix. snow or raine gwo store the xxx. & xxxi. more seasonable sky.

Of Februarie.

THe first and second pleasant drie dayes.

First quarter the iii. being friday, and the iiii. reasonable though with some winds. the v. not much worse the vi. a little darkened with black cloudes, the vii. and viii. sometime dropping, the ix. and x. warme sunshine dayes.

Full Moone the xi. being Saterday, and the xii. continuing reasonable and frosty, the xiii. xiiii. and xv. sometyme shewring and very windy, the xvi. and xvii. foggy raw ayre.

Les

Last quarter the xviii. being Satterday a very pleasant springing day: the xix. the windes trouble the sky: the xx. & xxi. freizing cold and hailing: the xxii. & xxiii. haile turned to rain or sleete: the xxiiii. not alwaies holding vp.

New Moone the xxv. being Satterday a cold fleeting day: the xxvi. not as the best: the xxvii. and xxviii. indifferent daies except the first raine towards night.

Of March.

The first and second drying sharpe windy daies: the iii. not so cold though still windy.

First quarter the iiii. being Satterday, sky troubled with diuers colored cloudes: the v. & vi. hardly holding vp: the vii. a tempestious troublesome day: the viii. & ix. far better daies then x. & xi. dry dayes for the spring.

Full Moone the xii. being Sunday, a good windy day: the xiii. & xiiii. Summer like weather: the xv. quartill of Mars and the Sunne troubling the skie somewhat: the xvi. a wet day: the xvii. and xviii. warme kindly daies, the xix. not so warme.

Last quarter the xx. day being Monday and the xxi. colde drying daies with a frost in the morning, the xxii and xxiii. dewing sometime, the xxiiii. and xxv. scarce faire dayes.

New Moone the xxvi. being Sonday, and xxvii. pleasant shining daies, the xxviii. and xxix still dry, though not so warme, the xxx. and xxxi holding faire though winde threaten worse.

Of Aprill.

The first a darke windie day, the second dankish ayre.

First quarter the iii. being monday, vnstedfast skie, the iiii. a cleare day, the v. and vi. hot daies disposed to dewes, the vii. a pleasant coole day: the viii. a frosty morning, the ix. and x. seasoned with some windy Aprill shewers.

Full Moone the xi. being Tewsday, and the xii. indifferent for the most part, the xiii. and xiiii. reasonable faire daies the xv. xvi. and xvii. drying good daies.

Last

Laſt quarter the viii. being Tewſday, a windy loude day: the xix. & xx. moiſt & cloudy daies: the xxi. wet indeed: the xxii and xxiii. wel amended: the xxiiii. a dry day.

New Woone the xxv. being Tewſday ſometime cloſe: the xxvi. dry and cold: the xxvii. and xxviii. faire blowing dayes: the xxix. and xxx. ſometime diſtilling dewes.

Of May.

The firſt ſertil of Saturne and Mars, a troubleſome ſky: the ii. well appeaſed.

Firſt quarter the iii. day being Wedneſday a pleaſant faire day: the iiii. indifferent: the v. ayre diſpoſed diuerſly: the vi. and vii. white racking clouds: the viii. windes aloft: the ix. often ſhowring.

Full Woone the x. being Wedneſday, a wet day: the xi. & xii. better weather: the xiii. and xiiii. dry coole daies: the xv & xvi. ſometime raine falles.

Laſt quarter the xvii. being wedneſday, and the xviii hardly holding faire: the xix. and xx. faire daies though ſo mixing: the xxi. diuers coloured cloudes rowling in the ſky: the xxii. ſomtime dropping, the xxiii. a windye day promiſing change of weather.

New Woone the xxiiii. being Wedneſday, and the xxv. faire kindly daies though the mornings be darke: the xxvi. xxvii. and xxviii. indifferent good daies with ſome miſtes: the xxix. and xxx hot dry daies: the xxxi. not ſo hot yet faire.

Of Iune.

The firſt a faire coole day.

Firſt quarter the ii. being Friday, and the iii. and iiii. good ſommerlike weather: the v, and vi ſometime raine the vii. a hot dry day: the viii. like to thunder and dew.

Full Woone the ix. being Friday, and the x. winds chaſe away raine: the xi. a faire day: the xii. ſome deawes if winde hinder not: the xiii. and xiiii. ſometime dropping.

Laſt

Last quarter the xv. being Thursday an indifferent close day, the xvi. and xvii. sultry hot, the xviii. heate alayed, the xix. some dewes towards night, the xx. fayre, the xxi. and xxii. blustering faire daies.

New Moone the xxiii. being Friday a darke day yet dry, the xxiiii. still overcast the xxv. and xxvi. verie hot daies, the xxvii. looks for thunder and lightning, the xxviii. and xxix. somewhat troubled skie like the other, the xxx. a quiet and calme day.

Of Iuly.

First quarter the first day being Satterday, a loud windie day, the ii. and iii. not free from shewers, the iiii. verie wet, the v. well amended the vi. and vii. indifferent.

Ful moone the viii. being Satterday, a pleasant day, the ix. and x. not altogether drie, the xi. and xii. much raine lyke to a tempest, the xiii. and xiiii. faire parching hot dayes.

Last quarter the xv. being Satterday misling deawes sometime, the xvi. a dry day, the xvii. and xviii. change of wether like to follow, the xix. like to thunder, the xx. and xxi. faire daies, if thunder bring not rain, the xxii. a verie hot day yet holding vp.

New Moone the xxiii. being Sonday and the xxiiii. exceeding hot daies the xxv. not so hot, the xxvi. thunder with small misslings, the xxvii. and xxviii. though cloudy yet holding vp, the xxix. quartil of Saturne AND Venus, heat well alayed, the xxx. a reasonable good day.

First quarter the xxxi. being Monday a fickle day.

Of August.

The first and second hot calme daies, hardly passing without a tempest, the iii. and iiii. skie more quiet, the v. indifferent.

Full Moone Eclipsed the vi. day being Sonday, a pleasant blowing day, the vii. and viii. dropping sometime, and sometime rumbling, the ix. vnconstant, the x. more stayed skie, the xi. and xii. verie good harvest wether.

Last

Laſt quarter the xiii. being Sonday, and the xiiii. reaſonable kindely weather, the xv. a cloudy day like to thunder, the xvi. conjunction of Saturne and Mars, and the xvii. verie troubleſome dayes either for winde or wether; the xviii. not ſo bad, the xix. and xx. drie and hot dayes.

New Moone the xxi. being Monday and the xxii. not ſo hot but drie, the xxiii. thunder and lightning at night, the xxiiii. and xxv. pleaſant ſommerlike weather, the xxvi. and xxvii. miſtie mornings but reaſonable daies, the xxviii. diſturbed blacke ſkie.

Firſt quarter the xxix. being Tewſday a hot cloſe day, the xxx. and xxxi. more cleare daies.

Of September.

The firſt a reaſonable coole day, the ſecond and iii. ſinging loud windes threatning wet, the iiii. ſomewhat dewy.

Full Moone the v. being Tewſday a wet day, the vi. and vii. ſomewhat better but windie, the viii. and ix. reaſonable daies though a little miſling, the x. and xi. good healthfull weather.

Laſt quarter the xii. being Tewſday, and the xiii. and xiiii. ſeaſoned with ſome ſhewers, the xv. and xvi. like the former, the xvii. xviii. and xix. not much worſe but cooler.

New moone the xx. being Wedneſday, a faire day, the xxi. loud windes and boiſterous, the xxii. xxiii. and xxiiii. more calme but not ſo faire, the xxv. and xxvi. hot and drie daies.

Firſt quarter the xxvii. being wedneſday, a faire temperat day, the xxviii. a little overcaſt, the xxix. and xxx. ſomewhat moiſt but not verie foule.

Of October.

The firſt and ſecond colde and wet daies, the iii. well amended.

Full moone the iiii. being Wedneſday, a faire windie day the v. and vi. cold drie daies, the vii. like to freeze, the viii. and ix. windie and drie, the x. and xi. miſling and moiſt.

Laſt

Last quarter the xii. being Thursday, a boysterous day but faire, the xiii. and xiiii not much vnlike the former: the xv and xvi. cold and like to hayle or snow, the xvii xviii and xix. blustering cleare dayes.

New Moone the xx being Fryday, and the xxi. disposed to some wet, the xxii. and xxiii fayre weather though sometime ouercast, the xxiiii. and xxv. colde dayes yet dry and like to hayle: the xxvi. enclining to moysture.

First quarter the xxvii being Friday a close day, the xxviii. and xxix. it raineth downe right, the xxx. and xxxi. windes cleare the skie.

Of Nouember.

The first a dry day though somewhat darke, the second more cleare.

Full moone the iii. being Friday, a cold windie day the iiii. and v. rawe blustering ayre, the vi. vii. and viii. often dropping, the ix. vnstayed skie.

Last quarter the x. being Friday a faire blowing day, the xi. and xii. cold and like to freize, the xiii. xiiii and xv. ruffling ayre, the xvi. and xvii. scarce holding from raine.

New moon the xviii. being Satterday and the xix warm pleasant daies, the xx. and xxi. looke for hard weather, the xxii xxiii. and xxiiii. snow or sleete with cold frosts.

First quarter the xxv. being Satterday, and the xxvi. cold misling raw ayre, the xxvii. and xxviii not so cold and fayre, the xxix. and xxx. cold againe frosty threatning hayle or snow.

Of December.

The first a faire windie day.

Full moone the second being Satterday, the winds very loud, the iii. iiii. and v. oftentimes lowring, the vi. and vii. not so wet yet close sometime: the viii. and ix. cold frosty daies with hayle or snow.

Last quarter the x. being Sonday, a fayre frosty day, the xi.

xi. and xii. tempeſteous rough daies, the xiii. xiiii. and xv. foggie ayze and ſome dewes, the xvi. a little wet, the xvii. ſomewhat better.

Newe moone the xviii. being Monday, and the xix. faire and froſty, the xx. and xxi. ſeaſoned with moiſt dewes. the xxii and xxiii. very moyſt vnkind dayes.

Firſt quarter the xxiiii. being Sunday, and the xxv. fayze cleere daies: the xxvi. and xxvii. froſty, dry and ſharpe ayze: the xxviii. and xxix. pleaſant windy wether: the xxx. ſome ſnow or haile: the xxxi. fleete or raine to end the yeere.

FINIS.

The principall Fayres of England and Wales, orderly set foorth, with the moneth, day and place where they be kept.

Faires in January.

The first day. Twelf day, at Salisburie.

Thursday after Twelf day at Banburie.

The iiii. day conuersion of S. Paule. at Gravesende, at Ruistow, at Churchingford, at Northallerton in Yorkeshyre: euery Wednesday from Christmas vntill June following, where is a fayre.

Fayres in Februarie.

The first day, Briget, At Bromley. The ii. day Candlemas day, at Maidstone, at Bath, at Lume, at Bicklesworth, at Budworth.

The xiiii. day Valentine, at Fuersham.

The xviii. day S. Mathias at Henley vpon Thames, at Tewkesburie at Baldock, at Frome.

On Ashwednesday, at Tamworth, at Rotstone, at Dunstable, at Exceter, at Abington, at Cicester, at Lichfielde.

First thursday in Lent, at Banburie.

Faires in March.

The xii. day Gregorie, at Stamford, at Sudburie.

The viii. day Theodore, at Rye, at the Mount, at Bodmin in Cornewal.

The xv. day. Cuthbert, at Durham.

On Midlent Sunday, at Saffron Walden in Essex, at Durham.

The Monday before the Annuntiation of Mary, at Milbich, at Kendall.

The xviii. day, at Lanncrchymeth in the county of Angleyley.

The xvi. day Annuntiation of Mary, at Northhampton, at Walden, at great Chart, at Newcastle, at Ashwell in Hartfordshire. Generally al ỳ Ladie daies, fayres at Huntingtō.

Faires in Aprill.

The second day, at Northfleete, at Rochford, at Hitchin.

The iii. day at Leeke in Staffordshire.

The
